Forecast for Wednesday 14 Apr 2021

Weather: A chilly but bright start on the hills, with fog and mist in valleys. Fog will clear quickly after dawn with plenty of sunshine through the morning allowing for UV levels to become moderate. Clouds will bubble up through the morning with cloudier skies and the odd shower possible. Into the evening cloud will begin to break up again allowing for another cold night with fog reforming in valleys.

Chance of cloud free mountain/hill tops above 800m: 100% becoming 80% from mid-morning and 100% by early evening.

Visibility: Excellent visibilities on hill tops but poor in valleys first thing. Through the morning cloud develops with bases of 900-1100m, making for temporarily reduced visibility on the highest peaks especially in and around any showers. By the evening cloud breaks up and visibility will become widely excellent again.

Meteorologist's View

The weather will continue to feel cool on hill tops with the freezing level at around 800m, particularly during cloudier periods and at the start and end of the day.

Forecast for Thursday 15 Apr 2021

Weather: Another sunny and chilly start with any valley fog clearing after dawn. The clearest skies for hill tops are expected to be in the morning as by lunchtime skies will become cloudier. However, some sunny spells will continue through the afternoon with UV levels remaining moderate. Skies clear in the early evening setting the scene for another cold and misty night.

Maximum wind: Easterly 8mph with gusts of 15mph.

Chance of cloud free mountain/hill tops above 800m: 100%.

Visibility: Visibilities will be excellent on hill tops through the day, with cloud bases above 1200m, but poor in valleys first and last thing.

Temperature: **Valleys:** Plus 2 Celsius becoming Plus 9 Celsius.
At 800m: Minus 2 Celsius becoming Plus 4 Celsius.
Freezing level: 900m
